

irr::constraints_irr

```
graph LR; A[bond::Bond::compute_yield] --> B[irr::constraints_irr];
```

The diagram illustrates a function call. A box on the right, labeled 'bond::Bond::compute_yield', has a blue arrow pointing to a box on the left, labeled 'irr::constraints_irr'. The 'irr::constraints_irr' box has a light gray background, while the 'bond::Bond::compute_yield' box has a white background. Both boxes have a black border.

bond::Bond::compute
_yield
